DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 9, 2004 has been entered.

Allowable Subject Matter

2. Claims 6-8, 10-14, and 16, 17-20 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor fairly suggest a method for selectively separating components having a molecular weight below a threshold value from a multi-component fluidic sample, said method comprising: introducing said multi-component fluidic sample into a micro-fluidic device having a fluid flow path and at least one micro-valve comprising a phase reversible gel material having a first porosity that can be modulated in response to an applied stimulus to provide a second porosity; and contacting said introduced multi-component fluidic sample with said micro-valve under conditions sufficient for said components of said multi-component fluidic sample having a molecular weight below said threshold value to at least move into said micro-valve while the remaining components of said multi-component fluidic sample having molecular weights above said threshold level are excluded from entering said micro-valve and

thereby remain outside of said micro-valve; wherein said method comprises modulating the porosity of said micro-valve by applying said stimulus to said gel having said first porosity to provide said gel with said second porosity that selectively allows sample components that have a molecular weight below said threshold value to at least move into said micro-valve while excluding entry into said micro-valve of sample components having molecular weights above said threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burns, Mark A. et al., Harding, George et al., Liu, Changsheng et al., Stein, Arnold et al., Chu, Benjamin et al., Menchen, Steven Michael et al., and Wiktorowicz, John disclose gel separation methods.
